▼ Application integration

To automate and manage transcription job, use the following call. **Info**

Example API request

```
1  {
2      "TranscriptionJobName": "TranscriptionJob",
3      "LanguageCode": "en-US",
4      "MediaSampleRateHertz": 48000,
5      "MediaFormat": "ogg",
6      "Media": {
7          "MediaFileUri": "s3://bucket-1664/echo audio1.mp3"
8      }
9  }
```

Example API response

```json
1 ▼ {
2 ▼     "TranscriptionJob": {
3           "TranscriptionJobName": "TranscriptionJob",
4           "TranscriptionJobStatus": "COMPLETED",
5           "LanguageCode": "en-US",
6           "MediaSampleRateHertz": 48000,
7           "MediaFormat": "ogg",
8 ▼         "Media": {
9               "MediaFileUri": "s3://bucket-1664/echo audio1
                    .mp3"
10          },
11 ▼        "Transcript": {
12              "TranscriptFileUri": "https://s3.us-east-1
                    .amazonaws.com/aws-transcribe-us-east-1
